

Applied Risk OT Solution Snapshot

Dealing with sophisticated cyber security attacks against Operations Technology (OT) is a very difficult task, even for large organisations with a high security maturity level.

Applied Risk offers a defined, repeatable and trusted methodology for handling cyber security incidents in industrial environments, providing access to a team of experienced OT cyber security professionals that are trained to take appropriate actions to remediate the operational impact.

Our extensive experience and vulnerabilities database sets us apart. Our dedicated research team and Incident Responders are continuously exploring new tactics and techniques. Leveraging our extensive OT experience and knowledge of various industrial sectors, we can minimise the disruption you're experiencing in production environment in a safe and effective manner throughout the five stages of our incident management process; identification, containment, eradication, recovery and remediation.

Key Benefits

- Establish effective strategies to prepare for and respond swiftly to incidents to minimise negative impacts on your organisation
- We ensure that your business receives expert guidance from a dedicated Incident Manager
- Benefit from leading expertise of industrial components (PLC, RTU, IEDs... etc.), malware analysis, threat intelligence, incident management and more
- Short notice response times to meet the requirements of our clients and their unique facilities

Applied Risk's incident response solutions can address the following areas:

- Preparation of incident response plans, including training, implementing and testing backup strategies, and performing incident response exercises.
- Determining the root cause of the incident, affected resources and overall business impact with the most appropriate remediation
- Eliminating the root cause of the incident by taking remedial actions that are largely determined by the type of incident that has occurred
- Request immediate on-demand assistance or prepare for swift action with a retainer-based partnership
